#### Airport personnel / events logged

- tour report logs all key personnel on duty for future documentation
- master log provides records of events during a shift of duty
- new forms and subjects can be added by the user
- filter functions help finding records for earlier events by type of event / month / tour or even names

#### Generates forms for management of common events

- Notams are easily produced and logged, they can be printed or faxed as needed to all recipients
- 139 inspection tours simplified with easy to fill out forms
- Complete 139 reports maintained for FAA needs
- work orders can be generated and updated by the system, status of work orders can be verified at any time
- property damage, personnel injury forms log full incident / photos / witness information for future use
- lost and found forms further assist all parties

**FAR 139 Inspection** Date/Time: 5/11/2000 16:20 Ops # 1
