SOFTWARE PROPERTIES

Alpine has produced FIDS Software Products for over 15 years. Both airports and airlines have enjoyed the extreme flexibility of the Omni-Fids System. The input module is very intuitive and the variation of the display output is unlimited. The automated interfaces provide the passengers the most accurate information available.

ENHANCEMENTS

Gate display and control enhancements, Internet posting, Smartphone display, SMS Messaging, IVR Response modules Low power radio enhancements, and Baggage Display, Advertising Modules are all enhancements that greatly benefit the passenger experience.

Alpine provides design, implementation, and support, for all our systems. The 24/7 Messaging Service frequently allows Alpine to respond for service needs before the site is aware of a problem.
